

9. Cities of employment, Auckland, Wellington and Christchurch. Burroughs New Zealand will endeavour to place the men in the city of their preference however, it must be realised that this will not always be possible and employees must be prepared to commence in whichever city is nominated.

Overall, New Zealand are interested in employing 30 people from the Australian Programme made up as follows:-

28 Conversion Technicians (includes 6 field tech.)

2 Installation Officers.

All persons would be required to be in New Zealand during June, 1967 except the Installation Officers who would be required March/April, 67.

Obviously, due to the date required in New Zealand we must treat this whole matter carefully, especially where we have arranged transfers interstate, as under no circumstances do we want these to be altered. It is not our intention to penalise any person transferring interstate. All Plants in all probability will commence to cut down on manpower late May, early June and naturally if any transferees are interested in New Zealand they will not be penalised due to a late finish of the programme at the Plant at which they are employed at that time.

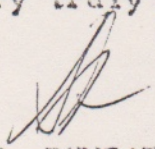

It goes without saying that before we agree to any transfer to New Zealand we must be able to see our way clear to releasing the particular person without jeopardising our own programme. Towards this end, anyone interested in the New Zealand Programme should be firmly told that they must finish the job here first.

Would you please discuss these terms with your men and ascertain how many would definitely be prepared to accept the New Zealand offer. Prepare and forward a list of the applicants to Head Office, B.C. stating the products on which they are competent.

Sydney and Melbourne Plants should endeavour to use this situation to advantage thus ensuring the satisfactory completion of their programme within the specified time.

This is a wonderful opportunity for the men concerned and they should be willing to work for it. Our recommendations to New Zealand will be based on good work habits and productivity.

Very truly yours,

D.B. DENGATE
Technical Manager
Decimal Currency Programme.
