TO WHOM IT MAY CONCERN

This is a personal testimonial in respect of Mr Michael John Day.

Michael worked with me for a period of twelve months during the decimal changeover programme.

During this period he proved to be a pleasant reliable and very diligent employee.

He was trained on the conversion of Basic Series P, P400, P600 and J, specialising in the last mentioned product.

He demonstrated a very marked degree of technical skill in the performance of his assigned tasks and, in fact, became the Series J specialist; this product requiring the most work as it involved a complete strip down.

I would have no hesitation in recommending him for a similar position.

W. J. FRYER
22 Murray Street,
UPPER HUTT, N.Z.
