

# DECIMAL CURRENCY PROGRAMME

## DECIMAL CONVERSION PLANT CIRCULAR No. 18

Date: 7th June, 1967

### SUBJECT: LOAN MACHINES POST-CONVERSION PROGRAMME

- 1.0. Attached is a Schedule (Schedule 1) of the adding, cash machine, calculator and V & R loan machines which have been allocated to your Plant for the post-conversion programme from July 10th 1967. These are the only styles of machines which the Decimal Currency Board have permitted loan machines to be provided for.
- 1.1. The quantities of loan machines shown for each plant have been approved by the Decimal Currency Board on a ratio of 1 loan machine for every 40 machines within a 50 mile radius of the plant (7 working days turnaround time) and 1 loan machine for every 30 machines for all other (9 working days turnaround time).
  - 1.1.1. These ratios include an allowance that some machines will be unserviceable at any one time.
- 1.2. To maintain the ratio of loan machines at this level the Board have requested that optimum use be made of the equipment in the way of allocating loan machines from one user to another without having them brought back into the plant for re-allocation. This will require detailed planning by Co-ordinators but should not be difficult to attain.
  - 1.2.1. The use of a visual graph record book as set out in Conversion Plant Circular No. 8 will assist materially in the continuous scheduling of loan machines.
- 2.0. LOAN MACHINES EX AUSTRALIA
- 2.1. Wherever possible we have been directed to use the machines owned by the Decimal Currency Board and purchased from Australia.
- 2.2. Where these are to be used is shown on Schedule 1 and the best of the machines returned from Trading Banks or in un-allocated stock should be used for this purpose.

In some instances farthings will be required for sterling loaners and a sufficient number of 1/4 styles, within the quantities allowed, should be included.
- 2.3. All loan machines in Trading Banks should be uplifted and returned to plants as soon after July 10th as practical transport arrangements can be made.

- 2.3.1. Further advice will be given as to the storing of the surplus machines not required for the post-conversion loan programme.
- 2.4. Handles are now available from Central Parts for the electric loan adding machines ex Australia and your requirements can be drawn from there. Having the handles will allow for greater flexibility in placing electric loan machines in lieu of hand adders.

3.0. LOANERS OTHER THAN THOSE EX AUSTRALIA

- 3.1. Where there were no suitable styles of machines from Australia we have secured sufficient units from Burroughs Ltd. New and Secondhand Consignment.

Except for 1008265 $\frac{1}{4}$  and 1010311 $\frac{1}{2}$  these will all be decimal units.

The quantity of units under this heading each plant has been allocated are shown also on Schedule 1.

- 3.2. The serial numbers of these units and where they are coming from is set out on Schedule 2.

- 3.2.1. Wherever possible we have had shipments consigned direct to the plant concerned but in some instances this was not possible.

Would all Plant Managers study Schedule 2 and where loan machines are consigned to their plant with the note that they are to be forwarded to another plant, to ensure this is done and the correct machine is forwarded.

- 3.3. Machines under this heading (i.e. on Schedule 2) to be unpacked and checked out by the plant they are finally destined to.

- 3.4. When received will plants make out a BDC 531, Loan Machine Record Card, for these new loan machines.

- 3.4.1. For all loan machines shown on Schedule 1 keep a concise record on the BDC 531 of the allocation so at any time the position of a loaner is known.

- 3.5. Loan machines shown on Schedule 2 are still the property of Burroughs Ltd., and would plants tag each machine involved with the words "LOANER BURROUGHS LTD. STYLE.....  
SERIAL NO....."

4.0. Naturally with our wide spread of styles we cannot provide the exact equivalent in the way of a loan machine, particularly in the case of Series J, however the spread of available styles should satisfy users for the relatively short time their machines will be away being converted.

Yours very truly,

Rex H. Bott.

R.H. BOTT, Manager,  
Decimal Currency Programme

# DECIMAL CURRENCY PROGRAMME

## DECIMAL CONVERSION PLANT CIRCULAR No. 18.1

Date: 8th June, 1967.

SUBJECT: LOAN MACHINES FOR POST-CONVERSION PROGRAMME  
FOR BANK OF NEW SOUTH WALES LTD.

- 1.0. Apart from the loan machines shown in Plant Circular No.18 the only other loan machines being provided are for the post-conversion programme of the Bank of New South Wales.  
As will be appreciated few of their accounting machines have been preconverted as most are dual currency.
- 2.0. The machines shown on the attached schedule are either owned by the Bank or Burroughs Ltd. (this is shown on the schedule) and machines should be tagged accordingly.
- 2.1. They will be used as loan machines for the Banks P401 $\frac{1}{2}$  and P402 $\frac{1}{2}$ , P613 $\frac{1}{2}$  and F5423 $\frac{1}{2}$  post-conversions.
- 3.0. All machines involved are either converted, to be converted or are in decimal so that after July 10th all Bank of New South Wales loaners will be in decimal. Where they are to be converted will Plants make arrangements for this.
- 3.1. The allocation to each Plant is shown and also the present location.
- 4.0. These machines are to be used exclusively for the Bank of New South Wales and a separate BDC 531 Record Card should be made out.
- 5.0. The P613 $\frac{1}{2}$  machines are to be set up in Plants to the attached layout. The F5307-4 machines have been factory ordered and are already set up to the attached layout.
- 5.1. Master Sets for the conversion of the P613 $\frac{1}{2}$  machines are also attached to a copy of this Circular as also are the Part IV's of the registration cards except for P324695S which will be sent to Wellington Plant when it comes from the Decimal Currency Board.
- 6.0. Where the machines on the attached schedule are at present in one Plant area we would ask them to be picked up and/or consigned to the Plant to which they are allocated. Would Plants make these arrangements between themselves and as with all loan machines see they have the correct quantity and serial numbers.

- 6.1. At the end of the Programme would all P402 and P613 loan machines owned by the Bank be returned to their Blair Street Store, Wellington.
- 7.0. It is essential with all loan machines that strict records are kept at all times as to their location as none of the loan machines whether those covered in this circular or Plant Circular No. 18 are owned by us. A full accounting of them will have to be made at the end of the Programme.

Yours very truly,

R.H. BOTT, Manager,  
Decimal Currency Programme

RHB:DMM

Att:

P.S. Layouts for the P613.1/2 referred to in 5.0. above are being sent separately. It has since been established that control bars could have already been set up in the factory for these units.

Copies of the layout for the F5307-4 referred to in 5.0 above will be contained in with the machines when received from the factory. The F5307-4 are set up to the layout at the factory.
